

2005 Business Plan Competition Winners

\$25,000 Herbert B. Jones Foundation Grand Prize Winner

Atheroson

David Dupree, T. Fettah Kosar, Srinath Narayanan, and Larry Rozsnyai

Is developing an ultrasound technology that will allow rapid, inexpensive, non-invasive, bedside evaluation of coronary artery disease. The envisaged small, portable, standalone machine, CoroScan, will detect and interpret the vibration caused by constricted arteries to determine the level of stenosis in a way that is not user dependant.

\$15,000 Vulcan Ventures Second Prize Winner

Therapeutic Monitoring Systems

Tauqeer Bashir, Christopher Brown, C. Michael Dickerson, Thomas Fare, and James Greener

TMS has developed the OncoMonitor, an implantable device that can detect the reoccurrence of cancer markers in the bloodstream. This implantable device can operate for up to three years inside a patient's body.

\$10,000 Third Prize Winner

Soren Systems

Adelina Balog, Edward Hansen, Cintra Pollack, and Ivan Shuvalov

Soren Systems is a renewable energy company dedicated to bringing customers clean, convenient, distributed solar electricity at a price lower than grid power.

\$7,000 Fourth Prize Winner

Sanifits

Parinaz Ejlali, Scott King, Justin Taber, and Owen Yee

Offers innovative sanitary solutions to the fast-food industry. Sanifits' flagship product, the CleanStep, converts current fast food waste receptacles into touch-less waste disposal systems.

Best Idea Prizes

\$5,000 DLA Piper Rudnick Gray Cary Technology Prize

Atheroson

David Dupree, T. Fettah Kosar, Srinath Narayanan, and Larry Rozsnyai

Is developing an ultrasound technology that will allow rapid, inexpensive, non-invasive, bedside evaluation of coronary artery disease. The envisaged small, portable, standalone machine, CoroScan, will detect and interpret the vibration caused by constricted arteries to determine the level of stenosis in a way that is not user dependant.

\$5,000 Service/Retail Prize

CollabSmart

Srini Subramanian, Tim Cooke, and Hans Omli

CollabSmart harnesses the collective buying power of small businesses operating in fragmented markets. This service is targeted, initially, to small construction companies allowing these companies to buy supplies at larger quality savings without the need to over purchase.

\$5,000 Non-Profit Prize

Washington all Abilities

Kelly Lawrence

\$5,000 Starbucks/UW Net Impact Sustainability Prize

Soren Systems

Adelina Balog, Edward Hansen, Cintra Pollack, and Ivan Shuvalov

Soren Systems is a renewable energy company dedicated to bringing customers clean, convenient, distributed solar electricity at a price lower than grid power.

\$5,000 UW Business School Global Business Center International Prize

MEDS

Alisha Lehr, Frances Donegan-Ryan, Kayler Body, Annika Rudback, Mahamouda Salouhou, and Foutse Khomh

MEDS is establishing medical training, employee placement, and exchange opportunities between Africa and the U.S. by improving technical health care education for young African adults.
