MBA Independent Study Guidelines

The faculty of the Foster School of Business recognize that there may be occasions on which Foster curricular offerings do not align fully with a given student’s academic, professional, and personal development goals. In those situations, students may be interested in pursuing independent work for academic credit with the permission and guidance of a Foster faculty member and the MBA Program Office. The following guidelines are designed both to aid you in assessing whether independent study is likely to align with your academic, professional, and personal development goals and to help you navigate the independent study process.

Following the guidelines below, you may register for independent study in either 2 or 4 credit increments, and you may register for a maximum of 4 credits of 600-level independent study coursework during any one quarter. Successful completion of such independent study counts toward fulfillment of one-half or one elective requirement, respectively. The MBA Program Office must approve independent study in excess of 4 credits. A maximum of 8 independent study credits count toward the MBA degree. Although 600-level courses count toward degree requirements, the grades are not included in your cumulative GPA. These 8 credits exclude independent study credits taken as part of Field Study Management or for participation in the Buerk Entrepreneurial Law Clinic or Buerk New Ventures Practicum. For Field Study Management, complete the Field Study Credit Request form available on the Current Students website. For the two Buerk Center categories of independent study, please complete only the Independent Study Registration Form available on the Current Students portion of the MBA website. For all other categories of independent study, please review the remainder of this document and submit both an Independent Study Project Agreement and the Independent Study Registration Form. Both documents are available on the Current Students portion of the MBA website.

The Independent Study Process

Independent study offers the student a great deal of flexibility with respect to topics to pursue. In exchange, the faculty and staff of the Foster MBA Program expect such study to be truly independent. MBA Program staff provide information to facilitate independent study registration. A faculty sponsor’s principal tasks are to provide critical feedback at the beginning and end of the process—first to a student proposal and last to the student’s completed work—in order to certify the student’s effort as worthy of academic credit. Thus, the student is the primary driver of the independent study process and outcome. More specifically, the student interested in pursuing independent study credit is responsible for the following:

- Identifying a topic area of interest and communicating with the Director of Student Affairs
  Meet with the Director of Student Affairs (Tim Hossain for Evening MBAs; Sigrid Olsen for Full-time MBAs) to discuss your independent study idea and learn the process for pursuing this study option.
• Developing a concise, written proposal and submit it to the Director of Student Affairs. Develop a short (2-5 page) written proposal outlining the basics of the project. Feel free to address whatever topics you deem most relevant, but please include a description of your proposed area of study, learning goals, the time investment to which you are committing, intermittent and final deliverables to be submitted, a timeline for each deliverable or phase of the project, evaluation criteria for measuring project success, and a communication plan for interacting with a faculty sponsor. The Director of Student Affairs will review your proposal and approve or deny your request.

• Finding a Foster School faculty member (not a teaching assistant) willing to sponsor an independent study. Depending upon the nature of your project idea, staff in the MBA Program Office may be willing to offer recommendations about which faculty might best fit your learning goals; however, they are unable to manage communications with faculty or otherwise secure faculty support on your behalf. Please note that the School is unable to guarantee that a faculty member will sponsor a given independent study project. Rather, securing a faculty sponsor is a negotiated process between the student and prospective faculty that may regrettably not end in a match due to faculty availability, interest, or expertise.

• Reaching agreement with the faculty sponsor on your independent study proposal. We advise you to first email a potential faculty sponsor to assess initial interest and availability. Presuming a positive initial reaction, you should email your written proposal and request a follow-up discussion. Doing so lowers the transaction costs of negotiating with faculty, increases the odds of securing a faculty sponsor, and provides a roadmap for your own successful completion of the independent study project. Moreover, you must submit a project agreement signed by both you and your faculty sponsor prior to receiving permission from the MBA Program Office to enroll in any independent study course. The Independent Study Request and Project Agreement form is available on the MBA Independent Study webpage.

• Completing the Independent Study Request and Project Agreement form, forwarding them to the faculty sponsor to sign, retrieving the completed form, and bringing the signed form to the MBA Program Office. Independent study registration must be completed within the first three weeks of the quarter, so you are advised to begin your search for a faculty sponsor well in advance of the start of the academic quarter in which you seek credit. The MBA Program Office can provide you with the appropriate course name, course number, SLN, and faculty code for the faculty member who has agreed to sponsor your independent study. Course credits for independent study are assigned on an “equivalent credits” basis, e.g., a 2-credit independent study should entail 60-80 hours of effort during the quarter (akin to a traditional 2-credit course that meets in-class for 2 hours per week and entails 4-6 hours of effort outside of the classroom per week). Likewise, a 4-credit independent study should entail 120-160 hours of effort during the quarter. Please note that this total is exclusive of work developing the proposal and securing faculty sponsorship.

Full-time students complete registration using MyUW. Evening students must send a request to enroll in the class to the MBA Program Office at mbaregis@uw.edu, and either type of student should drop off a hard copy of the signed project agreement and
Independent Study Request form in the MBA Program Office prior to registration.

- Executing the independent study project plan, submitting all deliverables as outlined in the plan, and presenting at the end of quarter independent study Colloquium. Just as with any other Foster course, student deliverables should be submitted to faculty via an agreed medium and on time. The MBA Program Office and Foster School of Business faculty recommend that independent study students meet with their advisors on a minimum of 3 occasions beyond initial set-up meetings. These include meetings in weeks 3, 6, and 9. Submission of the final deliverable—including any presentation to an external client—must occur by the first day of the final examination week listed on the University of Washington Academic Calendar in order for the faculty sponsor to evaluate the work product, offer feedback if appropriate, and assign a course grade. Just as in a traditional course; late work jeopardizes the student’s ability to earn academic credit for the experience.

Further, each student registered for independent study must prepare and deliver a brief (10-15 minute) oral presentation outlining his or her study and findings at the end of quarter Independent Study Colloquium. The presentation should describe the independent study you pursued, explain its significance, and summarize key findings or learnings for a motivated observer who was otherwise not involved with your project. The Colloquium itself is held during the last week of the quarter. The MBA Program Office will send you information about scheduling your Colloquium presentation time when you submit your Independent Study registration materials. Sponsoring faculty are invited but not required to attend, though at least one Foster faculty member or MBA Program staff member will attend each quarter. A student who does not present a satisfactory oral presentation at the Colloquium will be ineligible to receive academic credit that quarter. Presuming that he or she has otherwise made satisfactory progress on the project, a grade of I (incomplete) will be assigned, and the student will be invited to present at a regularly scheduled Colloquium the following academic quarter. Please note that this means the student’s grade will be delayed by one full quarter (which in some cases could delay a student’s planned graduation). In the interest of timely receipt of academic credit, please ensure that you add the Colloquium presentation to your personal schedule as soon as you schedule it.

**Types of Independent Study and Required Work Product**

The faculty envision 3 types of independent study, each with its own minimum work product required to earn academic credit. These are:

1. **Academic-based independent study in which a student’s work mirrors that of an existing course offered at another university.** At times a student may be interested in pursuing a traditional academic course that is not offered at the University of Washington. In such a situation the student may secure a syllabus from an existing course at another university, complete the work outlined on the syllabus, and author a paper which critically evaluates the content domain of the course. The paper must follow a standard format for grammar and citation consistent with graduate-level university work (e.g.,
MLA, APA, etc.) and address the potential application of independent study content to real-world organizational challenges or opportunities. The minimum paper length for a 2-credit independent study course critically evaluating an academic content domain is 10 pages (double-spaced, 11-12 point font, with 1-inch margins), and the minimum for a 4-credit course is 20 pages.

Please note that the paper requirement is in addition to any project paper(s) required as part of the regular course syllabus. If the syllabus specifies an exam in lieu of a project or paper, the student should propose and complete an additional project-based paper as negotiated with the sponsoring faculty member.

2. Application-based independent study which concludes with a persuasive recommendation to a real-world organization outside the University of Washington. Foster faculty appreciate the inherent value of application of rigorous, evidence-based academic content to empirical problems. In this type of independent study, the student addresses a complex, real-world, unstructured challenge or opportunity faced by an organization outside the University of Washington. He or she identifies a specific problem, chooses a goal or goals to serve as the performance standard for alternatives addressing the problem, evaluates all viable alternatives, and outlines a recommended course of action complete with implementation plan, timeline, resource requirements, anticipated outcomes, and risks and contingent actions. In many situations the recommendations may be presented orally to the host organization, but they must also be offered in a written document intended to persuade in order to warrant independent study credit. The minimum paper length for a 2-credit independent study course providing managerial recommendations is 6 pages exclusive of supporting exhibits (double-spaced, 11-12 point font, with 1-inch margins), and the minimum for a 4-credit course is 12 pages exclusive of supporting exhibits. The paper must follow a standard format for grammar and citation consistent with graduate-level university work (e.g., MLA, AP, etc.) and should include an executive summary outlining the essence of the logic and rationale supporting the recommendation. In the case of Full-Time students, the written document may be submitted to the MBA Program Office along with the appropriate forms for consideration of fulfillment of a Practical Experience requirement.

3. Research-based independent study for which the final deliverable is a teaching case that may be used in a subsequent MBA courses. In this variety of independent study, the student conducts independent research related to a topic of academic and/or professional interest and creates a Harvard-style teaching case to illustrate the concepts in question. For example, in the past a student assessed a market opportunity for a new venture and then wrote a teaching case that described the nature of the opportunity such that readers could assess the opportunity themselves. Please note that the case organization and actors may be either real or fictional, and students should secure the proper release for any non-public material used in the case. The case must follow a standard format for grammar and citation consistent with MBA-level teaching materials, and it must include a teaching note that provides a case synopsis, suggested study questions, a discussion of those questions, and Excel spreadsheets or other supporting analysis materials. If the case is based upon a real organization, the teaching note should also provide a brief overview of what happened in the organization following the period covered by the case. The minimum case length for a 2-credit independent study
course is 6 pages of text (double-spaced, 11-12 point font, with 1-inch margins), and the minimum for a 4-credit course is 12 pages. Typical teaching notes run 4-10 pages in length, though you should feel free to use as much space as necessary to convey the information you would like to offer.
