Instructor Information

Michael R. Wagner is an Associate Professor of Operations Management. He can be reached at mrwagner@uw.edu (please use this email rather than messaging me via Canvas). Office hours are Wednesdays 9:30-10:20 via Zoom (https://washington.zoom.us/j/9288653565).

Course Description and Objectives

Business analytics are techniques that enterprises use to gain insight from their data and make better decisions. Many firms in a variety of industries use these techniques: Google, Amazon, Target, Coca-Cola, WalMart. These techniques are applicable to the many functional areas of business, such as operations, marketing, accounting, finance, etc. Furthermore, the modern abundance of data, “Big Data,” underscores the value that analytics can provide a firm, be it non-profit, for-profit, or government.

In this course we will employ quantitative tools and sophisticated software (Tableau and R) to learn analytics. This course does not aim to produce experts in statistical analysis; rather, the aim is to provide students competency to interact with and manage a team of analytics professionals. Furthermore, this is not a technical or theoretical course; we will instead focus on the application of analytics techniques to real business situations, with the aim of creating insight and value.

The course goals are as follows:
1. Students should be able to think critically about business analytics, which includes selecting the right type of analysis for a given task.
2. Students should be able to identify opportunities for applying business analytics, in real business settings.
3. Students should be well equipped to become data-savvy managers.

To achieve the above goals, lectures will cover the major concepts and analytical tools. Case assignments will allow you to analyze different industry settings, analyze different company strategic problems, and identify key issues related to data and modeling.

Textbooks

2. An Introduction to Statistical Learning: with Applications in R, James, Witten, Hastie, Tibshirani. Springer, 2017. (Optional)

Computer Software

We will be using Tableau and R in this class. These software packages are both available remotely via Foster’s virtual labs accessible at https://fsb-lab.foster.uw.edu. Student licenses to Tableau are freely available; R is free for everyone.

- Tableau can be downloaded at https://www.tableau.com/academic/students
- R can be downloaded at https://cran.fhcrc.org
  - R Studio (a graphical user interface) can be downloaded at https://www.rstudio.com/products/rstudio/download/ (get the free desktop version)
Quizzes

There are 8 quizzes, all available on Canvas. These will either require you to submit a file to Canvas, or answer 1-2 multiple choice questions. See Canvas for additional details.

Assignments

There will be 5 case assignments – see Canvas for assignment details and due dates. Students are expected to work either individually or in groups on the cases. However, each student must submit his/her own solution. These assignments must be electronically submitted through Canvas by their due date – late assignments will not be accepted in the Canvas system.

Group Project

The final assignment of this course will consist of a group project where teams (of 4-5 students) will apply the techniques of the course to real data. There are four sets of deliverables:

1. 2 progress reports, due November 22 and 29.
2. A 15-20 minute presentation to the class on December 7 or 9 (randomly assigned)
3. A 5-10 page writeup, due December 7.
4. Peer evaluations of your group members, due December 9.

I recommend that your group find and use a cleaned data set for this project to avoid extensive cleaning. Further details will be discussed as the quarter progresses.

Participation

There will be numerous asynchronous and synchronous activities, where your participation will be graded:

1. In the first part of the class, there will be discussion board prompts on Canvas, and your participation is required (the work is minimal).
2. In the second half of the class, there will be synchronous discussions of the ethics of analytics (via Zoom), and the quantity and quality of your participation will be assessed.

Grading

Student numerical grades will be calculated applying the following allocation in a simple weighted average:

1. Case Analyses 40%
2. Project 40%
3. Quizzes 10%
4. Participation 10%

The (required) target median GPA in this class is 3.4 – 3.6, and I will curve to this requirement.

Foster Code of Conduct

By being a student in this course you acknowledge that you are a part of a learning community at the Foster School of Business that is committed to the highest academic standards. As a part of this community, you pledge to uphold the fundamental standards of honesty, respect, and integrity, and accept the responsibility to encourage others to adhere to these standards.

Religious Accommodations Policy

Washington state law requires that UW develop a policy for accommodation of student absences or significant hardship due to reasons of faith or conscience, or for organized religious activities. The UW's policy, including more information about how to request an accommodation, is available at Religious Accommodations Policy. Accommodations must be requested within the first two weeks of this course using the Religious Accommodations Request form.
CLASS SCHEDULE AND TOPICS

0. Week of 9/30/20 – 10/2/20
   • Course introduction (live via Zoom) on Wednesday, 9/30/20 (https://washington.zoom.us/j/9288653565) from 8:30-10:20am

1. Week of 10/5/20 – 10/9/20
   • Introduction to Tableau and Visualization Analytics
   • Visualization Case (Tableau), Discussion 1, and Quizzes 1.1-1.2 due by Sunday, 10/11/20 11:59pm

2. Week of 10/12/20 – 10/16/20
   • Introduction to R and Prediction Analytics
   • Prediction Case (Climate Change), Discussion 2, and Quizzes 2.1-2.2 due by Sunday, 10/18/20 11:59pm

3. Week of 10/19/20 – 10/23/20
   • Classification Analytics 1/2
   • Classification Case I (Vandalism on Wikipedia), Discussion 3, and Quiz 3.1 due by Sunday, 10/25/20 11:59pm

4. Week of 10/26/20 – 10/30/20
   • Classification Analytics 2/2
   • Classification Case II (Lending Club) and Quizzes 4.1 due by Sunday, 11/1/20 11:59pm

5. Week of 11/2/20 – 11/6/20
   • Clustering Analytics
   • Clustering Case (Hubway), Discussion 5, and Quizzes 5.1-5.2 due by Sunday, 11/8/20 11:59pm

   • Introduction to Group Project – we will meet synchronously for the first half of the regular class session (8:30-9:20am, PST) on Monday, 11/19/20 (Wednesdays is Veterans Day), office hours will be held during the second half (9:30-10:20am, PST).

7. Week of 11/16/20 – 11/20/20
   • Future Trends of Analytics – we will meet synchronously for the full class session (8:30-10:20am, PST) on Wednesday, 11/18/20, and your participation will be evaluated for Discussion 7
   • Project Progress Report #1 due by Sunday, 11/22/20 11:59pm

   • Free week to work on project and enjoy Thanksgiving – office hours as usual
   • Project Progress Report #2 due by Sunday, 11/29/20 11:59pm

   • The Ethics of Analytics 2/2 – we will meet synchronously for the full class session (8:30-10:20am, PST) on Wednesday, 12/2/20, and your participation will be evaluated for Discussion 9

10. Week of 12/7/20 – 12/11/20
    • Group presentations on both Monday, 12/7 and 12/9 during the regularly scheduled class session (8:30-10:20am, PST) – the presentation is due 12/7 by 8:30am, PST
    • Group writeup due 12/7 by 8:30am, PST
    • Peer evaluations due 12/9 by 5:00pm, PST
