MILITARY EMPLOYMENT

Officer, Behavioral Scientist, United States Air Force, 2000-2004

Prior to pursuing a Ph.D., I was an active duty officer in the United States Air Force. I worked as a Behavioral Scientist (Air Force Specialty Code: 61S1B) in the Fatigue Countermeasures branch of the Air Force Research Laboratory. In addition to my research activities, I was trained as an Acquisitions officer with a focus on project management.

RESEARCH INTERESTS

I bring disciplinary lenses of psychology, biology, and public health to my research, mostly in the context of studying the experiences people have at work. My research primarily examines human sustainability. Within this domain, my research has had a special emphasis on sleep and circadian rhythms. This includes both the effects of sleep on work as well as the effects of work on sleep (see my TEDx talk on sleep and work: <https://www.youtube.com/watch?v=z8rpaCSm708>). My research on human sustainability also includes additional topics of work life conflict and leadership.
